

What's multimodal / literature

2 evaluations.

3. Memory Retention (good ~~feedback~~ feedback)

4. Design make use of medical literature.

8. Phone has accelerometer to do CPR. (multimodal)

6. Link to chat we found.

7. How to do 2 evaluation.

more than one evaluation needs to be done.

1. Real life testing of app to public (Primary)

2. Survey (Lastly)

↓
Specific → Goal → Users can remember the steps?

HEURISTIC

Connective workflow

→ Evaluation methods.

• What is the best way to evaluate the

steps?

• what are the goals.

• what the evaluation suitable to

Survey

Do I enjoy? how easy is it to use this app.
